No prerequisite, however Brain Gym® 101 and/or Infant Postural Reflexes helpful

*"Svetlana and Peter and Pamela came to work with Lily over a two day period. The next day Lily laughed for the first time in her life. Eight months later, she is now two years old and can walk run and jump and has a 500-word vocabulary that she uses while she "reads" books. The knowledge Svetlana and Peter brought to me is priceless. We will never be able to thank them enough."*

– Diane and Gary - Arkansas

# "Children *with* Challenges"

taught by

**Dr. Svetlana Masgutova**

Doctor in Developmental and  
Educational Psychology

**Learn the safe, simple  
and effective ways to  
look at Infant & Postural  
Reflexes and there use with  
challenged children and  
adults so they may connect  
with their fullest learning  
potential.**

Brain Gym® is a registered trademark of the  
Educational Kinesiology Foundation

## About Children with Challenges

This course will provide an in-depth study of how to look at lifelong reflexes as they influence the body structure and postural development in relation to gravitation, grounding, balancing, centering, head righting, Tendon Guard and others.

Learn about the concepts while exploring the mechanics of their integration with the whole "Body-Mind" system.

Our program is an anti-stress program, aimed on motor-sensory and sensory-motor integrating processes. It is directed on:

\*\*This course individualizes programs for children who have different developmental challenges: displaying aggressive behavior, worry and fear, low learning motivation, chronic school failure, dyslexia, hyperactivity (ADD and ADHD), autism, cerebral palsy, delayed intellect, and delayed emotional development. \*\* Based on the use of the dynamic and postural reflexes, children with developmental challenges learn: reduction of learning stress, activation of natural mechanisms of development, support of special basic developmental and movement skills, facilitation of emotions, motivation, and movement development and learning.

\*\* This course is seeking approval for use in the Brain Gym® certification procedure within the next few years

## About the Instructor

Svetlana Masgutova is a Doctor in Developmental and Educational Psychology, International Educational-Kinesiology Faculty for Russia, Director of the "Ascension" Institute, and the Educational-Kinesiology Mentor for Poland.

For years she has worked as a University lecturer and Russian Educational Academy scientific worker. She is the author of 54 publications on psychology, education, Educational-Kinesiology, art creativity, and movement development.

**13-years  
of research  
has gone into  
"Children with  
Challenges.**

The last 13 years, Svetlana has been doing research work on the Educational Kinesiology Methods, and studies the influence of the Educational-Kinesiology movements on personality, emotions, movement development and learning challenges. She is widely interested in using movement and drawing to facilitate the emotional recovery and physical rehabilitation processes of a person.

Svetlana works with psychologists, educators, victims of catastrophes, war victims, childhood abuse, and social crises -- all the while paying attention to their emotional recovery.

For information on Svetlana's work refer to:
